Rich,

Attached is the latest version of the sampling plan for the Dimock Residential Groundwater Site. The list of parameters and the methods are included in Table 1 of the sampling plan (page 16 of 18). However, please note that some of the methods (biological, alpha spec, & Rn-222) listed are under review and are awaiting EPA confirmation before they are approved for use on this project. I can provide an updated Table as soon as I receive confirmation regarding those methods. Please let me know if you have any questions,  
Thanks,

Suddha Graves
